Solugrade H125

125 cph / 45.000 eph

Medium scale Egg Grading & Packing Machine

High weighing accuracy:

Egg weights are measured in high accuracy by means of special weighing hardware and software, each egg is measured 20 times to determine actual weight

4 or 5 classes of egg grades:

Sorts the eggs into 4 or 5 classes according to its weights, first class of eggs are picked into tray automatically by packer, the others are collected from the table by hand

Modular Plug & Play Design:

Easy and thoroughly cleaning thanks to its detachable plug & play mechanism

Hatchery proof grading and packing

Gentle treatment of eggs during grading and packing
